

SUMMARY

M. Benchohra, N. Rezoug – <i>Second Order Semilinear Evolution Equations with Infinite Delay via Measure of Noncompactness</i>	1
A. Eghbiq, M. Darus – <i>Fekete-Szegő Theorem for a class of functions defined by a Derivative Operator</i>	17
A. Dertli, Y. Cengellenmis – <i>Quantum Codes from Cyclic Codes over A_3</i> ...	31
A. Shafie – <i>Necessary and sufficient optimality conditions for D.C vector optimization</i>	41
G. Ingalahalli, C.S. Bagewadi – <i>A Study on ϕ-Symmetric τ-curvature tensor in K-contact manifold</i>	53
Á. O. Páll-Szabó, O. Engel, E. Szatmári – <i>Certain class of analytic functions with varying arguments defined by the convolution of Sălăgean and Ruscheweyh derivative</i>	61
V. T. Nguyen, A. Oprea, D. Breaz – <i>Convexity properties for a new integral operator</i>	75
R. M. El-Ashwah, W. Y. Kota – <i>Some Condition on a Poisson Distribution Series to be in Subclasses of Univalent Functions</i>	89
V. Pescar, A. Sasu – <i>Classes of an univalent integral operator</i>	105
P. Kaur, S. Singh Billing – <i>Some Sandwich-type Results for ϕ-like Functions</i>	115
